Design II is intended to continue to introduce students to design fundamentals and professional practices. The student will learn basic design principles and become familiarized with material construction of design forms.

**Class Format:** Class meetings will include lecture, demonstration, critique, and time to work on projects. The majority of work will be completed outside of class.

**STUDENTS MUST BE PRESENT AT ALL CRITIQUES.**

**Concord University Educational Goal(s):** This course directly supports **Concord University General Studies Educational Goal #2.6**. An awareness of the aesthetic principles, methods, materials, and media employed in artistic performance and the creation of works of art and literature

**National Standards:** N/A

**Learning Outcomes:**

- Students will demonstrate knowledge of design fundamentals and principles and their application.
- Students will demonstrate knowledge of general physical design materials, technique, traditional and contemporary trends.
- Students will conceive and complete expressive objects using a variety of materials and techniques.

-Students will become familiarized with assembling physical design objects

-Students will become familiarized with the process of presenting their work to review

-Students will become familiarized with design philosophies and techniques.

-The successful course participant will demonstrate an awareness of the aesthetic principles, methods, materials, and media employed in the creation of works of art. Awareness of aesthetic principles, methods, materials, and media will be assessed through the creation of art works.

### **Course Requirements:**

A grade of a C or better is required for credit for art majors.

### **Grading Policy and Scale, Make-up Policy, Late Work:**

**Course Activities** Class meetings will include lecture, demonstration, critique, and time to complete assignments.

An average of:

- 4 design projects projects

- 4 critique presentations (These are independent grades from one another. Students must present their art project physically for review AND must be present for critiques. Students will give a critique presentation outlining and defending their design choices and philosophies.)

Students will be evaluated on their DAILY work habits and progress. I cannot judge your work if you are not present on workdays or if you are not working in class. Therefore, your final project grade will drop if I do not witness consistent progress on your projects. It is ill-advised to think you can miss class and bring a completed work on the final day thinking you will get a full, good grade. It just isn't so.

You may not think so, but I see you on your cell phones during critiques and on workdays. I would advise against this. I will take the frequency of these instances into account when evaluating your critique and presentations grades. Critique and presentation grades are evaluated using your presentation of your own work and how well you listen and critique the work of others. BE PRESENT. BE INVOLVED.

### **Grading Scale:**

90% - 100% = A

80% - 89% = B

70% - 79% = C

60% - 69% = D

59% - and below = F
